psoriasis

vitiligo

acne (uva)

dermatitis

For more than 30 years Dermalight has specialised in the manufacturing of high-quality UV-irradiation units for the treatment of skin diseases like Psoriasis, Neurodermatitis, Acne and Vitiligo. Quality Germany design and construction ensures years of trouble free operation, backed by a 2 year warranty.

Dermalight80 is suitable for treatment of the body and scalp and comes with a handy removable light comb for scalp treatment. The comb also works as a distance guide for body treatment if required.

Dermalight80 is listed with the Australian TGA as a medical device.

\*90 day guarantee, conditions apply including must be in original condition and packaging, less a 15% restocking fee.
